

This listing of claims will replace all prior versions and listings of the claims in the application:

Listing of Claims:

We claim:

1. (Presently Presented) A cable routing system [assembly] for use with a passenger vehicle having a plurality of rows of passenger seats, comprising:
at least a first row of seats and a second row of seats

a multiconductor cable having a length and first and second ends having respective first and second connectors coupled thereto, wherein the multi-conductor cable is configured to convey electrical signals between at least [one of] the first row[s] of seats and [a] the second [one of the] row[s] of seats; and

a cable storage unit configured to hold a coiled portion of the length of the multi-conductor cable, wherein the cable storage unit has a housing configured to be mounted underneath at least one of the passenger seats.

2. (Cancelled)

3. (Previously Presented) A cable [assembly] routing system as defined in claim

1, wherein the cable storage unit comprises a reel configured to be rotated relative to the housing, such that when the reel is rotated, [to change] the [size] length of the coiled portion within the cable storage unit changes.

4. (Cancelled)

5. (Previously Presented) A cable routing system as defined in claim 1, wherein the first and second connectors include at least one of a DIN connector or an RCA connector.

6. (Previously Presented) A cable routing system as defined in claim 1, wherein the multi-conductor cable comprises at least one Ethernet conductor.

7. (Previously Presented) A cable routing system as defined in claim 1, wherein the vehicle is an aircraft.
